DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 and 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 58-170510A. JP '510 discloses a slotted screen 7 in a housing 3, introducing means 2, eccentric mounted rotary means 6, and recovery means 10. The term "hinged" in claim 2 is interpreted as -- connected to--.
3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by JP 56-111011. JP '011 discloses a cylindrical screen 12 with an eccentrically mounted means 13. The pulp is fed into the screen 12 from above and the fine pulp flows inside to out through the screen while retained coarse solids are moved to the bottom of the screen for discharge.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-4 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP58-170510. The use of conventional solids moving devices such as screws and pumps are well known as is making of parts out of plastics for ease of manufacture and low costs. One of ordinary skill would possess such knowledge and the ability to combine them with the teaching of JP 580170510.
